River Landing Village is one step closer to reality.

City council approved the conceptual design of the downtown complex at last night's meeting.

Victory Majors is now ready to move on to the next step to get construction started on the project.

"Now we're on to our architectural controls and hopefully we can get a building permit once we have

our final design," said John Nasser of Victory Majors.

Nasser also said they would like to start construction this fall but it will probably be next spring or summer before shovels are in the ground.

Full build-out is expected to take four years.

When complete, River Landing Village will house a 27-story residential tower along with an office building and hotel.
